ABOUT ME

Full-stack web developer specialising in production SaaS products built with Next.js, TypeScript and Supabase. Experienced in the full delivery cycle, from UI and database design to deployment and infrastructure, with AI features shipped to live products using Gemini and Claude. Backed by a strong Computer Science foundation and experienced in remote collaboration with international clients.

DEVOPS AND INFRASTRUCTURE

Vercel | Uptime Monitoring | VPS setup | Cloudflare (DNS, CDN, SSL, Firewall) | Email Authentication (SPF, DKIM, MX)

TOOLS AND TESTING

Git and GitHub | Canva, Figma | Jest, React Testing Library | WordPress, Elementor, WooCommerce | Google Workspace

OTHER

C/C++ | Technical SEO | UI/UX | Windows, GNU/Linux, MacOS

WORK EXPERIENCE

Self Employed Remote, Pakistan

Freelance Full-Stack Web Developer

2023 – Current

- Designed, built and deployed production SaaS platforms for international clients on a remote basis using Next.js, TypeScript, React, Tailwind CSS and Supabase
- Developed [Amely.ai](#), an AI-powered director search and crew booking platform, delivering the waitlist, director portal and a full Crew Portal with sign-up, availability calendars, CV upload, crew search and admin management
- Developed [MyMe](#), a personal knowledge base app with JWT authentication, a folder and block content structure, a People graph, goals and an interactive Three.js visualiser
- Integrated AI services including Google Gemini, Anthropic Claude and Azure Computer Vision OCR into live products
- Set up and managed production infrastructure, including Vercel deployments, Supabase connection pooling, separate dev and prod databases, Cloudflare DNS and SSL, and transactional email with SPF, DKIM and MX records
- Provided VPS setup, security hardening, uptime monitoring and technical SEO for client websites
- Worked with clients remotely across time zones, managing code through Git and GitHub

Fiverr Remote, Pakistan

Freelance Logo Designer

2019 – 2019

- Designed text-based logos and YouTube channel banners for international clients on a remote freelance basis
- Turned client briefs into finished brand designs to their specifications
- Handled revisions and delivered final artwork in the formats each client needed

PROJECTS

Evalica, AI Paper Evaluation System

Designed and built an AI-powered grading platform where teachers upload handwritten or typed answer sheets, define rubrics and answer keys, and receive AI-generated grades with feedback. Features OCR with Azure Computer Vision, grading with Google Gemini, bulk PDF upload, class and student analytics, and PDF and Excel export. Built with Next.js, TypeScript, PostgreSQL (Neon), Drizzle ORM, Vercel Blob and Tailwind CSS.

AcademiaSync, Shared Academic Task Manager

Designed and built a real-time collaboration platform where university students in the same section share assignments, quizzes and deadlines on one dashboard. When one student adds a task, the whole section sees it instantly. Includes optional Google Calendar sync using only the calendar.events scope, organisation by university, major, semester and section, and user profiles with light and dark themes. Wrote a unit testing suite of 57 Jest tests with around 99% code coverage.

WhitePrnt Studio, Web Development and Design Studio

Founded a web development and design studio offering white-label development for agencies. Mentored a junior developer intern through two landing page builds, covering code reviews and best practices.
